#### **About Monday Morning**

Monday morning is a weekly E- CAS (Electronic Current Awareness Service) of RMRC Library, Bhubaneswar which carries one Biomedical & health science news item and some useful current medical research links so that the scientists can access the articles. This E- Bulletin starts its journey from 21<sup>st</sup> Nov. 2016. In this maiden attempt we cordially invite your inputs and suggestions to improve in future.

**Dr. Banamber Sahoo, Lib & Inf. Officer**  
**Sonali Sribastab& Shaktidhar Barik (Lib. Trainee)**

#### ***Oral bacteria in pancreas linked to more aggressive tumours***

**The presence of oral bacteria in so-called cystic pancreatic tumours is associated with the severity of the tumour, researchers report. It is hoped that the results can help to improve diagnosis and treatment of pancreatic cancer.**

## 1. Stroke victims with busy immune responses may also see mental declines

Insecticide-treated bed nets, like this one in Mali, are effective at preventing malaria infection, but mosquitoes are increasingly developing resistance to the chemicals. Antimalarial drugs that target the malaria parasite in the mosquito might one day be a useful addition to the nets. For more details, click on the below link

## 2. Can You Learn Anything While You Sleep?

There are only 24 hours in a day, and usually about a third of that is spent sleeping. So, the overambitious have always wondered: Is it possible to make use of this time and learn a new skill or even a language?. For more details, click on the below link

<https://www.livescience.com/64920-how-learn-during-sleep.html>

## 3. WHO launches new global influenza strategy

WHO today released a Global Influenza Strategy for 2019-2030 aimed at protecting people in all countries from the threat of influenza. The goal of the strategy is to prevent seasonal influenza, control the spread of influenza from animals to humans, and prepare for the next influenza pandemic. For more details, click on the below link

## 4. Breast Cancer Could Be Cured Soon As Researchers Identify Key Gene Behind Deadly Disease

Australian researchers have tracked an elusive cancer-promoting gene that appears to be behind aggressive breast cancers, paving the way for crucial therapeutic drug treatment for the deadly disease. For more details, click on the below link

<https://www.indiatimes.com/health/breast-cancer-could-be-cured-soon-as-researchers-identify-key-gene-behind-deadly-disease-363583.html>

## 5. Cardiovascular screenings uncover diabetes, high cholesterol in middle schoolers

A pilot study of 45 middle school kids shows that more than a third of those screened had abnormal levels of blood sugar or high cholesterol. Two had blood sugar levels (HbA1c) in the diabetes range For more details, click on the below link
