#### **About Monday Morning**

Monday morning is a weekly E- CAS (Electronic Current Awareness Service) of RMRC Library, Bhubaneswar which carries one Biomedical & health science news item and some useful current medical research links so that the scientists can access the articles. This E- Bulletin starts its journey from 21<sup>st</sup> Nov. 2016. In this maiden attempt we cordially invite your inputs and suggestions to improve in future.

**Dr. Banamber Sahoo, Lib & Inf. Officer**  
**Sonali Sribastab & Shaktidhar Barik (Lib. Trainee)**

#### *Immunotherapy kicks and kills HIV by exploiting a common virus*

**MDC1 (BLUE) SIGNALING TO T HELPER CELLS (YELLOW) THAT HARBOR LATENT HIV.**

## 1. How an Injection of Tiny Beads into Stomach Arteries Might Help with Weight Loss

An experimental obesity treatment that involves injecting tiny beads into the arteries of the stomach may help some people lose weight and keep it off for at least a year, according to a new study. For more details, click on the below link

<https://www.livescience.com/65138-bariatric-embolization-weight-loss.html>

## 2. New hope for treating childhood brain cancer

There could be new treatments on the horizon for diffuse intrinsic pontine glioma, or DIPG, a devastating form of brain cancer that afflicts young children and is currently incurable. Recent experiments in animal models of the disease have identified an experimental drug that effectively destroys DIPG cells. For more details, click on the below link

## 4. Researchers identify 'beauty spots' in the genome

Humans tend to be preoccupied with beauty -- a person's attractiveness is associated with academic performance, career success and economic mobility. But despite its importance, scientists know little about the genetic basis for having a pretty face. For more details, click on the below link
