About Monday Morning

Monday morning is a weekly E- CAS (Electronic Current Awareness Service) of RMRC Library, Bhubaneswar which carries one Biomedical & health science news item and some useful current medical research links so that the scientists can access the articles. This E- Bulletin starts its journey from 21st Nov. 2016. In this maiden attempt we cordially invite your inputs and suggestions to improve in future.

Dr. Banamber Sahoo, Lib & Inf. Officer
Poonam Singh Deo & Sonali Sribastab (Lib. Trainee)

How obesity may harm memory and learning

CHOMP Obesity may prod immune cells to nibble parts of nerve cell connections called synapses, a mouse study suggests.

1. Shedding light on 100-year-old cancer

For almost a century, scientists have observed a strange behavior in cancer cells: They prefer a less-efficient pathway to produce energy. While normal cells utilize aerobic glycolysis to use glucose to produce 36 energy-storing adenosine triphosphate (ATP) molecules, most cancer cells, despite the presence of oxygen, switch to anaerobic glycolysis, which only produces two ATPs.
