" A library is the delivery room for the birth of ideas, a place where history comes to life."

Norman Cousins

About Monday Morning

Monday morning is a weekly E- CAS (Electronic Current Awareness Service) of RMRC Library, Bhubaneswar which carries one Biomedical & health science news item and some useful current medical research links so that the scientists can access the articles. This E- Bulletin starts its journey from 21st Nov. 2016. In this maiden attempt we cordially invite your inputs and suggestions to improve in future.

Dr. Banamber Sahoo, Lib & Inf. Officer
Adyasa Bhoi & Suryajit Samal (Lib. Trainee)

What Is Epilepsy?

Epilepsy is a chronic condition characterized by recurrent seizures.

1. Fluoridated water impairs baby IQ?

A study published Monday linked consumption of fluoridated tap water during pregnancy to lower IQ scores in infants, a finding at odds with decades of public health messaging extolling the mineral's benefits in reducing cavities. For more details, click on the below link

2. Unprecedented therapy found effective for blood cancer patients with no treatment options.

Mount Sinai researchers have found a new type of therapy to be effective for patients with a particular type of bone marrow cancer that is resistant to several standard therapies. For more details, click on the below link

3. Researchers discover cause of asthmatic lung spasms.

Bronchospasm can occur in both healthy people and those who suffer from serious respiratory diseases such as asthma or chronic obstructive pulmonary disease (COPD). Studying why the smooth muscle surrounding bronchial airways can suddenly contract and lead to difficulties in breathing is difficult due to the complexities of bronchospasm and the fact that the human respiratory system cannot be modeled in animal studies. For more details, click on the below link

4. Japanese scientists get approval to create first human-animal hybrid

Japanese scientists are all set to create the first human-animal hybrid after the government of Japan lifted the ban on stem-cell research. In this experiment, Dr Hiromitsu Nakauchi, lead researcher at the University of Tokyo and Stanford University in California, will attempt to plant human cells in animals like rats and mice. For more details, click on the below link
