About Monday Morning

Monday morning is a weekly E- CAS (Electronic Current Awareness Service) of RMRC Library, Bhubaneswar which carries one Biomedical & health science news item and some useful current medical research links so that the scientists can access the articles. This E- Bulletin starts its journey from 21st Nov. 2016. In this maiden attempt we cordially invite your inputs and suggestions to improve in future.

Dr. Banamber Sahoo, Lib & Inf. Officer
Adyasa Bhoi & Suryajit Samal (Lib. Trainee)

*Doctors Are Trying to Use CRISPR to Fight Cancer.
The 1st Trial Suggests It's Safe.*

Preliminary data from an innovative clinical trial suggests CRISPR could be safe for use in cancer therapy.

3. New Study Shows Researchers May Be One Step Closer to Intercepting Lung Cancer Earlier.

A team of scientists, including those from Janssen and the Lung Cancer Initiative at Johnson & Johnson, found that biomarkers related to the immune system may be able to aid doctors in identifying high-risk lung cancer patients—and treating them—at the earliest stage of the disease.. For more details, click on the below link.

4. 5-Inch-Long Tapeworm Lived in Man's Brain for More Than a Decade.

A man in China experienced seizures and other mysterious symptoms for years before doctors finally found the cause: He had a rare parasite living in his brain, which had likely been there for more than a decade. For more details, click on the below link.

5. Global Warming May Also Give Rise To The Problem Of Undernutrition.

A new study published in PLOS Medicine by Yuming Guo of Monash University, Australia, and colleagues claim to have found out that undernutrition can also be on one of the outcomes of global warming. Climate change may bring into effect extreme heat exposure that may hinder adequate crop production in the long term, and thus, may result in larger undernourished population. For more details, click on the below link.
